

# RedTeam on the Road

Learn, Lead,  
Build, Transform

Nashville, May 13

**Effectively manage your  
subcontractor relationships**

**with construction software**

**Nashville | May 13**

# Effectively manage your subcontractor relationships with construction software

## RedTeam Go Training

This session will walk you through how to leverage Subcontractor Portals in construction management software from both the GC and vendor perspective. Walk away with tips and best practices on how to best manage your vendor relationships using the tools that construction technology provides.

# Session learning objectives

**After attending this session, you will...**

1

You'll understand the bid invitation process from the vendor and GC side to better enable a successful vendor relationship process

2

You'll learn best practices for how to create subcontracts with your vendors using a collaborative subcontractor vendor portal to save time and create efficiencies

3

You'll learn how to save time and avoid clerical errors throughout a construction project by implementing effective vendor management tools

4

You'll learn how to best manage vendor tasks for submittals, RFIs, punch and more to save time and stay on schedule

## About me

Eileen spent over 13 years as a Project Manager working for a Specialty Contractor in the state of Florida. During that time, one of her duties included working with General Contractors to ensure jobsite readiness prior to her company mobilizing to the site. Eileen now serves as an Implementation Specialist at RedTeam. She passionately supports clients in efficiently implementing new software, advocating for smarter work methods.

## About RedTeam

Construction is one of the world's most challenging industries. We get it, because we've been there. RedTeam understands what success looks like every step of the way. That's why we're focused on the entire project team from the office to the field. Your job will never be easy, but having maximum control over schedules, safety, quality and cost makes the day-to-day run better and more smoothly than ever before.

Implementation Specialist

Effectively manage your subcontractor relationships with construction software

# What communication hurdles do you come across when dealing with others outside of your organization?

- Remote communication
- Documentation
- Change management

## Benefits of the RedTeam Go Subcontractor Portal

- Improved communication
- Enhanced document management
- Efficient resource Allocation
- Risk management
- Accurate project tracking
- Valuable performance evaluation
- Stronger relationships with clients

These benefits contribute to a smoother workflow, reduced errors, and a more collaborative environment between contractors and subcontractors.

# Session learning objectives

## Recap: today you have learned...

- 1 The bid invitation process from the vendor and GC side to better enable a successful vendor relationship process
- 2 Best practices for how to create subcontracts with your vendors using a collaborative subcontractor vendor portal to save time and create efficiencies
- 3 How to save time and avoid clerical errors throughout a construction project by implementing effective vendor management tools
- 4 How to best manage vendor tasks for submittals, RFIs, punch and more to save time and stay on schedule
